

# Preventer™

## Preventive Maintenance

### Preventer Flow Diagram

Preventer is an add-on module to SAMM that provides automated, company-specific preventive maintenance procedures, safety inspections and any other maintenance or inspection routines required on a vessel. Preventer captures and schedules procedures through an intuitive, scalable and customizable application. Once programmed, the system automatically schedules calendar and hourly based actions, transmits the data by satellite and synchronizes it with a secure internet accessible shore application. The application contains a closed-loop work order, field requisition and purchase order component associated with any maintenance or inspection and maintains its status.

Preventer provides:

- Calendar & Hourly Based Actions
- Work Orders
- Field Requisitions/Request for Quote/Purchase Orders
- Shipyard Work Orders & Field Requisitions

Calendar Based Actions				Hourly Based Actions			
Calendar	Hourly	W/O	W/O	Calendar	Hourly	W/O	W/O
10/15/2011	10/15/2011	10/15/2011	10/15/2011	10/15/2011	10/15/2011	10/15/2011	10/15/2011
